

Innovation in  
Plastic Sheet and Profile Extrusion

Manufacturers of STOKBORD™ and CENTRIBOARD® plastic products

Centriforce Products Ltd.

[www.centriforce.com](http://www.centriforce.com)

# Europe's largest independent producer of recycled and virgin plastic sheet and profile products

For over 20 years, Centriforce Products has pioneered the use of extruded plastic products for a variety of industrial, agricultural and leisure applications. From playgrounds to pig pens, pallets to pit liners, van linings to underground cable protection, many of our products use recycled material from the waste stream.

Stokbord™ and Centriboard® are well-established brands recognised for their outstanding value and durable performance in extruded sheet and board. Holloplas™ extruded profiles provides economic, environmental and attractive solutions to fencing, signs, all weather sports surfaces and many other products.

From its state of the art 5 acre site in Liverpool, Centriforce's sourcing expertise, product innovation and manufacturing facilities are second to none. The current 20,000 tonnes capacity – with 3 recycling lines, 5 sheet lines and 2 profile lines, has been supplemented by

a new £1m extrusion line. Now the company is able to offer the most flexible and comprehensive range of extruded products in various sizes, colours and finishes to users worldwide.

Centriforce supports its worldwide network of stockists with the highest level of technical and commercial expertise. At the heart is an ongoing commitment to research and development that seeks to improve the versatility and range of recycled and virgin materials.

Working in conjunction with trade associations and research establishments, Centriforce is developing new applications for recycled plastics – providing a more versatile substitute for wood, and helping the environment.

Whatever your material requirement, Centriforce should be your first point of contact – a host of practical solutions all under one roof.

# The World of Centriforce

## ● INDUSTRIAL

Enabling a wide range of applications from slip sheets to high grade thermoplastic sheet.

## ● CONSTRUCTION

Cable covers and Centritile. The ideal medium for underground cable protection.

## ● LIVESTOCK

Manufacturing Stokbord® and Centriboard™, the ideal proven partition and lining board for all livestock systems.

## ● SPORTS AND LEISURE

A versatile choice for many sports and play systems including equestrian, tennis, football, playground and garden products.

## ● AUTOMOTIVE

Supplying materials to leading automotive interior companies.

## ● MUNICIPAL

Durable and attractive – the perfect alternative to wood for fencing, outdoor furniture and signage.

# Making the most of our materials

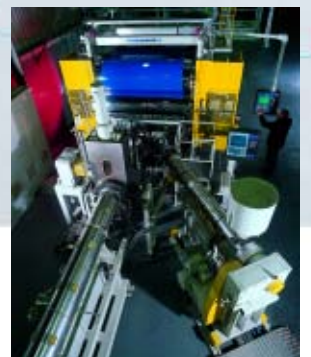

Centriforce is a great deal more than materials. We are skilled and dedicated extruders of plastic board and sheeting to suit all types of applications – from the commonplace to the most sophisticated.

Our success is based on an ability to provide exact solutions to our customers' requirements. Where this requires recycled material, we work closely with local authorities and the trade to make sure that our buyers have access to the best supply of clean plastic waste.

The establishment of an excellent source of waste materials from the most reliable trade suppliers, together with thorough inspection, separation, cleaning and processing facilities in our own factory guarantees the quality of the end product.

At Centriforce we also extrude virgin polymer from a variety of suppliers for applications that require a specific finish. We are constantly extending the horizons for applying high quality plastic materials that will give superior and durable performance. Each new product development is supported by experienced technicians. We also support research initiatives at universities.

“Centriforce is clearly investing in a bright future. I have no doubt that they will be leading their field for a long time to come.”

# Manufacturing to the highest standards

Sheet Capabilities include:

Size range -

Thickness: 0.5mm to 25mm

Width: Up to 1800mm

Length: Sheets and rolls to customer requirements.

Materials-

Polythene (LD, MD, HD, HMWHD)

Polypropylene

Polystyrene

EVA

Finishes-

Gloss and matt surfaces

Embossed surfaces

Film lamination

Carpet and/or fleece tri-laminates

“ We have worked very closely with Centriforce to develop a sustainable range of high quality outdoor leisure equipment that surpasses anything on the market in terms of durability, appearance and value. ”

The site operates to a strictly controlled quality management system, with high standards of health and safety to meet the requirements of ISO9002 and satisfy our status as a registered reprocessing plant with the Environmental Agency.

## Profiles

We offer a wide range of solid and hollow HDPE profiles in a variety of colours, surface finishes and formats.

Our new easy self assembly Holloplas Click & Fix™ system can easily be made into panels and has a simple and effective jointing system giving a smooth, easily cleaned surface.

# Finding the right solution is our goal

Meeting the exacting demands of industry is a keen challenge in any market or territory. At Centriforce we relish this challenge.

Our sales and support team know every aspect of the product and process, and work hard to command an equally strong knowledge of the market.

We pride ourselves on not just supplying products, but also ideas. Ideas to help you grow your market, and satisfy the requirements of your customers.

We are constantly developing new products and working on new ideas. So please do not hesitate to call us, and we would be delighted to visit you, or to welcome you to our premises.

“ We wanted it to be exactly right, and Centriforce was with us all the way. ”
