

Underground warning tape

High visibility marking
of buried utilities

- Non-adhesive coloured plastic film
- Printed with clear warning message
- Manufactured from low density polyethylene

Now available direct from Centriforce

Underground warning tape

Underground warning tape is a coloured, non-adhesive film, manufactured from low density polyethylene, and printed with a message to warn of the presence of buried utilities (eg electric cables, telecommunications or fibre optic cables, gas pipelines or water pipelines).

Underground warning tape is normally installed a specified distance directly above the service line so that any future excavators will be aware of the cable or pipeline further below.

Warning tapes will only offer a visual warning to excavators. They are not intended to offer any protection or resistance to further excavation. Warning tapes may also be used in combination with Stokbord® cable protection tiles or Tapetile® cable protection tape which offer a physical barrier to excavators.

Advantages

- High grade, low density polyethylene polymers
- Resistant to most soil types including alkaline and acid soils
- Available in a range of widths
- Lead-free pigments
- Custom manufacturing options

Typical applications

- Underground electric cables
- Telecoms and fibre optic cables
- Gas pipelines
- Water pipelines
- Sewer pipelines

Note: Underground warning tape can be custom manufactured in different colours and printed with specific messages and logos for identification purposes. Legend can be in English or any specified language.

Specifications

Premium grade

Length	Width	Thickness
365m	150mm	0.1mm (100µm)

Economy grade

Length	Width	Thickness
365m	150mm	0.05mm (50µm)

Standards and approvals

- 'Premium grade' manufactured to ENA-TS 12-23 Issue 3, 2013
- Centriforce has approvals from utility companies in many parts of the world
- Centriforce is fully accredited to ISO9001, ISO14001 and OHSAS 18001
