Locata™

Underground warning mesh

Locata underground warning mesh is a high strength polypropylene mesh produced by Centriforce at its state-of-the-art plant in Liverpool. The brightly coloured mesh, which carries a printed warning on the central panel, is designed to alert excavators to the presence of buried utilities.

The mesh is normally positioned along the full length of the utility, midway between the surface and the buried pipeline or cable. Light weight and easy to handle, the high visibility mesh provides the advance warning needed to prevent damage.

Advantages

- Manufactured from virgin polymers
- Resistant to most soil types, including alkaline and acid soils
- Custom options, including text, colour and language, available*

*subject to minimum order quantities.

Typical applications

- Gas pipelines
- Water pipelines
- Sewer pipelines
- Telecoms cables
- Electric cables

Specifications

Length	Width	Mesh weight
100m	100mm	55 g/m ²
100m	200mm	55 g/m ²
100m	300mm	55 g/m ²
